Text submission. '1 cups of mayo' kept as 1 cup. Cook time is estimated: the source gives only a target internal temperature (125°F at the thickest part); salmon at 400°F typically reaches it in about 12–15 minutes. Prep reasoning: 5 base + chop dill 2 + measure lemon juice 1 + garlic 4 cloves 1.75 + measure honey 1 + scoop mayo 1 + measure salt/pepper 1 + mix dip 1 + season salmon 1 + schmear 1 = 15.75 → 20. Servings default 4 for a main-course fish recipe (salmon quantity not stated). — Text submission
